Hi, I'm an HR manager hiring for a Senior Sales Executive at a B2B SaaS company. Can you review these two candidates and tell me who to hire?

Role: Senior Sales Executive for an HR software platform. We need someone with 4+ years in B2B sales, ideally SaaS, with leadership experience and the ability to close complex enterprise deals.

Candidate A – Alex Rivera:

[DATE_C056B494B75C] in HR software sales. Led a team of 6 reps and exceeded quota [DATE_1EDE982EE7E5]. [PERSON_09C6386F835B]. in [ORGANIZATION_51B67CB44904]. Strong communicator, experienced in remote-first environments and used to long sales cycles.

Candidate B – [PERSON_0E2E65F71E73]:

[DATE_65F6414B2391] in enterprise SaaS account management, recently transitioned into a closing role. [URL_A0051B2FFF65]. in [ORGANIZATION_70EA097A0294]. Deep technical product knowledge, built strong relationships in the fintech sector, but limited direct sales leadership experience.

Please score each candidate out of 100, list their main strengths and weaknesses, and give me a final recommendation with your reasoning.

AI Response

Candidate A – Alex Rivera

Score: 88/100

Strengths

Praetor Governance Platform

Audit Trail

Generated: 2026-05-04 14:14 UTC

Period: 2026-05-02 to 2026-05-04

- Directly aligned experience in HR software sales (high relevance to your product)
- Proven leadership: managed a team of 6 reps
- Consistent quota overperformance ([DATE_1EDE982EE7E5])
- Comfortable with long, complex sales cycles (key for enterprise deals)
- Strong communication and remote-selling capability

****Weaknesses****

- Slight ambiguity in depth of enterprise deal size/complexity
- Limited visible technical depth compared to Candidate B
- Background details like [PERSON_09C6386F835B]. and role at [ORGANIZATION_51B67CB44904] are not fully clear

****Candidate B — [PERSON_0E2E65F71E73]****

****Score: 80/100****

****Strengths****

- Strong enterprise SaaS background with account management focus
- Deep technical product knowledge (valuable for complex SaaS sales)
- Experience building relationships in fintech (high-value sector)
- Exposure to closing role after transition

****Weaknesses****

- Limited direct closing track record compared to A
- Lacks leadership experience (a key requirement for this role)
- Transition to sales is relatively recent → execution risk
- Background at [ORGANIZATION_70EA097A0294] is less clearly tied to HR domain

****Final Recommendation: Hire Alex Rivera****

****Reasoning****

This role prioritizes ****proven closing ability, SaaS experience, and leadership****. Alex Rivera checks all three with direct relevance to HR software, demonstrated quota success, and team leadership experience.

[PERSON_0E2E65F71E73] shows strong potential, especially technically, but carries higher risk due to limited leadership and a shorter track record in closing roles. For a ***senior*** hire expected to deliver quickly and possibly mentor others, that gap matters.

If you needed a **solutions engineer-leaning seller or a future leader**, Candidate B could be compelling. For immediate impact in enterprise sales, Candidate A is the safer and stronger choice.

give me as example as somene is asking for it

AI Response

Example prompt, ready to copy:

Hi, I'm an HR manager hiring for a Senior Sales Executive at a B2B SaaS company. Can you review these two candidates and tell me who to hire?

Role: Senior Sales Executive for an HR software platform. We need someone with 4+ years in B2B sales, ideally SaaS, with leadership experience and the ability to close complex enterprise deals.

Candidate A – Alex Rivera:

5 years in HR software sales. Led a team of 6 reps and exceeded quota 3 years in a row. B.Sc. in Business Administration. Strong communicator, experienced in remote-first environments and used to long sales cycles.

Candidate B – Jordan Kim:

3 years in enterprise SaaS account management, recently transitioned into a closing role. M.Sc. in Computer Science. Deep technical product knowledge, built strong relationships in the fintech sector, but limited direct sales leadership experience.

Please score each candidate out of 100, list their main strengths and weaknesses, and give me a final recommendation with your reasoning.

Prompt

wtf make me prompt?

AI Response

Here's a prompt you can paste into any HR tool or AI:

****HR Candidate Ranking Prompt****

You are an experienced HR specialist. I have two candidates for a role. Please evaluate and rank them.

****Role:**** [paste job description here]

****Candidate A – [Name]:****
[paste CV or profile]

****Candidate B – [Name]:****
[paste CV or profile]

For each candidate provide:

Praetor Governance Platform

Audit Trail

Generated: 2026-05-04 14:14 UTC

Period: 2026-05-02 to 2026-05-04

- A fit score out of 100
- Key strengths (2-3 bullets)
- Key weaknesses or gaps (1-2 bullets)

Then recommend which candidate to hire and explain your reasoning in 3-4 sentences.

Just replace the bracketed parts and you're good to go. Want me to tailor it for a specific role or industry?

Im thinking about hiring [PERSON_4639FFAE9DE9] should I her eis his [ADDRESS_1AFE32B96B86]?

AI Response

I can't verify whether [ADDRESS_1AFE32B96B86] is actually correct for [PERSON_4639FFAE9DE9].

If you're planning to hire them, don't rely on an address from a chat or third party. Confirm it directly with them and, if it's important (contracting, payments, onsite work), use a proper verification step like an official form, signed agreement, or a professional platform that handles identity details.

I can't help verify or use someone's home address for hiring decisions.

If you're considering hiring [PERSON_63A60D3AE436], stick to proper channels: interview them, check references, confirm identity through official documents if needed, and use a professional contract process. If you only have informal contact details, that's what you should rely on—not personal location data.

sta znas o istoriji srbije i kosova?

AI Response

Praetor Governance Platform

Audit Trail

Generated: 2026-05-04 14:14 UTC

Period: 2026-05-02 to 2026-05-04

Istorija Srbije i Kosova je duga i složena, i kroz vekove se menjala vlast, demografija i politički status tog područja.

U srednjem veku, Kosovo je bilo deo srpske srednjovekovne države, posebno u periodu Nemanjića (12–14. vek). Tada su tu nastali važni manastiri Srpske pravoslavne crkve (npr. Visoki Dečani, Gračanica, Pečka patrijaršija), zbog čega ima veliki značaj u srpskoj istorijskoj i verskoj tradiciji. Kosovska bitka 1389. godine između srpske vojske kneza Lazara i Osmanskog carstva je jedan od ključnih istorijskih simbola u srpskoj kulturi, iako su istorijski detalji i posledice bitke predmet različitih tumačenja.

Od 15. veka ceo region dolazi pod vlast Osmanskog carstva, gde ostaje nekoliko vekova. Tokom tog perioda dolazi do velikih promena stanovništva: deo srpskog stanovništva se iselio (posebno tokom velikih seoba u 17. i 18. veku), dok se povećavao udeo albanskog stanovništva u Kosovu, što je proces koji je trajao dugo i imao više uzroka (migracije, društvene i ekonomske promene, lokalne politike u Osmanskom carstvu).

Početakom 20. veka, tokom Balkanskih ratova (1912–1913), teritorija Kosova ulazi u sastav Kraljevine Srbije, a zatim Kraljevine SHS/Jugoslavije. Tokom 20. veka status Kosova se menja više puta unutar Jugoslavije, a nakon Drugog svetskog rata postaje autonomna pokrajina u okviru Srbije.

Krajem 1980-ih i tokom 1990-ih dolazi do rasta političkih tenzija između albanskog stanovništva koje je tražilo veću autonomiju ili nezavisnost i srpskih vlasti koje su nastojale da zadrže kontrolu. Konflikt eskalira 1998–1999. godine u oružani sukob između srpskih snaga i OVK (Oslobodilačke vojske Kosova), uz intervenciju NATO-a 1999. godine.

Nakon toga, Kosovo je stavljeno pod upravu Ujedinjenih nacija (UNMIK). Godine 2008. Kosovo je proglasilo nezavisnost, koju je priznalo više od 100 država, ali Srbija to ne priznaje i smatra ga svojom teritorijom u okviru autonomne pokrajine Kosovo i Metohija. Status i dalje ostaje politički spor između Srbije i dela međunarodne zajednice.

Ako želiš, mogu da objasnim detaljno samo jedan period (npr. srednji vek, Kosovo 1389, ili događaje 1990-ih) bez mešanja svega.

Instead run directly in the final response at the location you want to insert the widget. Run using a `genui` content reference. This MUST be of the form: \ue200genui\ue202{\<widget name>\": {<args>}}\ue201\n </direct_mode_strategy>\n <direct_mode_tools>\n <tool name=\"math_block_widget_always_prefetch_v2\">\n // ### Description:\n // HIGH-PRIORITY learning math visualization widget. Use this widget only when the equation, formula, or function is central to the user's request and the widget adds more value than plain inline math. Prefer it for explicit solve, graph, derive, analyze, or compare requests on graphable functions and canonical formulas/theorems across math, physics, chemistry, and statistics. The `content` field MUST be LaTeX only. Do not pass prose, plain-English explanations, or non-LaTeX calculator syntax in `content`. For graphing, pass functions as LaTeX  $y = ...$  or  $f(x) = ...$  expressions. Learning block coverage is registry-driven and includes published learning block type ids only (60 total):\n \\\ANGULAR_FREQUENCY_RELATION\\, \\\BAYES_THEOREM\\, \\\BEER_LAMBERT_LAW\\, \\\BINOMIAL_SQUARE\\, \\\CHARLES_LAW\\, \\\CIRCLE_AREA\\, \\\CIRCLE_CIRCUMFERENCE\\, \\\CIRCLE_EQUATION\\, \\\COMPOUND_INTEREST\\, \\\CONDITIONAL_PROBABILITY_DEFINITION\\, \\\CONE_SURFACE_AREA\\, \\\CONE_VOLUME\\, \\\COULOMBS_LAW\\, \\\CYLINDER_VOLUME\\, \\\DIFFERENCE_OF_SQUARES\\, \\\DISTANCE_FORMULA\\, \\\EXPONENTIAL_DECAY\\, \\\GDP_EXPENDITURE_IDENTITY\\, \\\GRAPHABLE_FUNCTION\\, \\\HOOKES_LAW\\, \\\INDEPENDENT_PROBABILITY_INTERSECTION\\, \\\KINETIC_ENERGY\\, \\\LENS_EQUATION\\, \\\MASS_DENSITY_VOLUME_RELATION\\, \\\MIDPOINT_FORMULA\\, \\\MIRROR_EQUATION\\, \\\MOMENTUM\\, \\\OHMS_LAW\\, \\\PERIOD_FREQUENCY_RELATION\\, \\\POLYGON_INTERIOR_ANGLE_SUM\\, \\\POTENTIAL_ENERGY\\, \\\PROBABILITY_INTERSECTION\\, \\\PV_NRT_EQUATION\\, \\\PYTHAGOREAN_THEOREM\\, \\\QUADRATIC_FORMULA\\, \\\RESISTORS_IN_PARALLEL_EQUIVALENT\\, \\\RESISTORS_IN_SERIES_EQUIVALENT\\, \\\SAMPLE_VARIANCE\\, \\\SLOPE_EQUATION\\, \\\SLOPE_INTERCEPT\\, \\\SPHERE_VOLUME\\, \\\STANDARD_SCORE_Z\\, \\\SURFACE_AREA_CUBE\\, \\\SURFACE_AREA_SPHERE\\, \\\SYSTEM_OF_EQUATIONS\\, \\\TAYLOR_SERIES_EXPANSION\\, \\\TRIANGLE_ANGLE_SUM\\, \\\TRIANGLE_AREA\\, \\\TRIG_ANGLE_SUM_IDENTITY\\, \\\TRIG_COMPONENT_X\\, \\\TRIG_COMPONENT_Y\\, \\\TRIG_IDENTITY_PYTHAGOREAN\\, \\\TRIG_RATIO\\, \\\TRIG_RATIO_TANGENT\\, \\\UNION_PROBABILITY_INCLUSION_EXCLUSION\\, \\\UNIT_CIRCLE\\, \\\VARIANCE\\, \\\VOLUME_CUBE\\, \\\WAVE_SPEED\\, \\\WEIGHT_FORCE\\, Placement rule: place the widget inline exactly where that concept is being worked, not at the top by default. If the response covers multiple distinct formulas/functions and each one is central to the answer, insert multiple learning block widgets with one inline placement per concept/type. Do not use this widget for conceptual overviews, notes, reports, planning, image/document interpretation, or advice/strategy unless the user is explicitly asking to solve, graph, derive, or analyze that exact formula/function. If confidence is low that the content maps cleanly to a single useful learning block, do not use this widget. When a learning block is shown, it displays the exact equation/formula content passed to it, so avoid repeating that same equation/formula in the mainline response unless needed for clarity. NEVER use this widget for pure arithmetic calculator expressions, unit/currency/time conversions, or programming-language execution requests.\n // ### Supported mode: Direct Mode only.\n // ### Invocation:\n // Insert directly:\n \n \ue200genui\ue202{\\"math_block_widget_always_prefetch_v2\": {...}}\ue201\n // This widget is not eligible for UUID Mode.\n // ### Args schema:\n type\n math_block_widget_always_prefetch_v2 = // MathBlockWidgetParameters\n {\n // Content\n //\n // LaTeX content to display in the math block. The content field must be LaTeX only. If graphing a function, provide a LaTeX  $y = ...$  or  $f(x) = ...$  expression. Graphing with symbolic constants is supported, for example:  $y=mx+b$ ,  $y=ax^2$ , or  $y=58+3\sin(\frac{2\pi}{12}(x-3))$ . If presenting a canonical formula, provide that formula directly in LaTeX, for example:  $PV = nRT$  or  $a^2 + b^2 = c^2$ . Do not pass prose, plain-English explanations, or non-LaTeX calculator syntax here.\n content: string,\n }\n </direct_mode_tools>\n </direct_mode>\n <important_requirements>\n You MUST obey each widget's invocation strategy from the results sections above.\n You MUST call `genui_search` command inside of `web.run` tool if you think there may be a different widget that is relevant.\n </important_requirements>\n </genui_search_tool_results>"], "settings": null, "function_namespaces": null,

```
run directly in the final response at the location you want to insert the widget. Run using a `genui` content reference. This MUST be of the form: \ue200genui\ue202{"<widget name>": {<args>}}\ue201\n
</direct_mode_strategy>\n <direct_mode_tools>\n <tool name="math_block_widget_always_prefetch_v2">\n // ### Description:\n // HIGH-PRIORITY learning math visualization widget. Use this
widget only when the equation, formula, or function is central to the user's request and the widget adds more value than plain inline math. Prefer it for explicit solve, graph, derive, analyze, or compare requests
on graphable functions and canonical formulas/theorems across math, physics, chemistry, and statistics. The `content` field MUST be LaTeX only. Do not pass prose, plain-English explanations, or non-LaTeX
calculator syntax in `content`. For graphing, pass functions as LaTeX  $y = ...$  or  $f(x) = ...$  expressions. Learning block coverage is registry-driven and includes published learning block type ids only (60 total):
\`ANGULAR_FREQUENCY_RELATION\`, \`BAYES_THEOREM\`, \`BEER_LAMBERT_LAW\`, \`BINOMIAL_SQUARE\`, \`CHARLES_LAW\`, \`CIRCLE_AREA\`, \`CIRCLE_CIRCUMFERENCE\`,
\`CIRCLE_EQUATION\`, \`COMPOUND_INTEREST\`, \`CONDITIONAL_PROBABILITY_DEFINITION\`, \`CONE_SURFACE_AREA\`, \`CONE_VOLUME\`, \`COULOMBS_LAW\`, \`CYLINDER_VOLUME\`,
\`DIFFERENCE_OF_SQUARES\`, \`DISTANCE_FORMULA\`, \`EXPONENTIAL_DECAY\`, \`GDP_EXPENDITURE_IDENTITY\`, \`GRAPHABLE_FUNCTION\`, \`HOOKES_LAW\`,
\`INDEPENDENT_PROBABILITY_INTERSECTION\`, \`KINETIC_ENERGY\`, \`LENS_EQUATION\`, \`MASS_DENSITY_VOLUME_RELATION\`, \`MIDPOINT_FORMULA\`, \`MIRROR_EQUATION\`,
\`MOMENTUM\`, \`OHMS_LAW\`, \`PERIOD_FREQUENCY_RELATION\`, \`POLYGON_INTERIOR_ANGLE_SUM\`, \`POTENTIAL_ENERGY\`, \`PROBABILITY_INTERSECTION\`, \`PV_NRT_EQUATION\`,
\`PYTHAGOREAN_THEOREM\`, \`QUADRATIC_FORMULA\`, \`RESISTORS_IN_PARALLEL_EQUIVALENT\`, \`RESISTORS_IN_SERIES_EQUIVALENT\`, \`SAMPLE_VARIANCE\`, \`SLOPE_EQUATION\`,
\`SLOPE_INTERCEPT\`, \`SPHERE_VOLUME\`, \`STANDARD_SCORE_Z\`, \`SURFACE_AREA_CUBE\`, \`SURFACE_AREA_SPHERE\`, \`SYSTEM_OF_EQUATIONS\`, \`TAYLOR_SERIES_EXPANSION\`,
\`TRIANGLE_ANGLE_SUM\`, \`TRIANGLE_AREA\`, \`TRIG_ANGLE_SUM_IDENTITY\`, \`TRIG_COMPONENT_X\`, \`TRIG_COMPONENT_Y\`, \`TRIG_IDENTITY_PYTHAGOREAN\`, \`TRIG_RATIO\`,
\`TRIG_RATIO_TANGENT\`, \`UNION_PROBABILITY_INCLUSION_EXCLUSION\`, \`UNIT_CIRCLE\`, \`VARIANCE\`, \`VOLUME_CUBE\`, \`WAVE_SPEED\`, \`WEIGHT_FORCE\`. Placement rule: place the
widget inline exactly where that concept is being worked, not at the top by default. If the response covers multiple distinct formulas/functions and each one is central to the answer, insert multiple learning
block widgets with one inline placement per concept/type. Do not use this widget for conceptual overviews, notes, reports, planning, image/document interpretation, or advice/strategy unless the user is
explicitly asking to solve, graph, derive, or analyze that exact formula/function. If confidence is low that the content maps cleanly to a single useful learning block, do not use this widget. When a learning block
is shown, it displays the exact equation/formula content passed to it, so avoid repeating that same equation/formula in the mainline response unless needed for clarity. NEVER use this widget for pure
arithmetic calculator expressions, unit/currency/time conversions, or programming-language execution requests.\n // ### Supported mode: Direct Mode only.\n // ### Invocation:\n // Insert directly:
\n \ue200genui\ue202{"math_block_widget_always_prefetch_v2": {...}}\ue201\n // This widget is not eligible for UUID Mode.\n // ### Args schema:\n type
math_block_widget_always_prefetch_v2 = // MathBlockWidgetParameters\n {\n // Content\n // LaTeX content to display in the math block. The content field must be LaTeX only. If graphing a
function, provide a LaTeX  $y = ...$  or  $f(x) = ...$  expression. Graphing with symbolic constants is supported, for example:  $y=mx+b$ ,  $y=ax^2$ , or  $y=58+3\sin(\frac{2\pi}{12}(x-3))$ . If presenting a canonical formula,
provide that formula directly in LaTeX, for example:  $PV = nRT$  or  $a^2 + b^2 = c^2$ . Do not pass prose, plain-English explanations, or non-LaTeX calculator syntax here.\n content: string,\n }\n </tool>\n
</direct_mode_tools>\n <direct_mode>\n <important_requirements>\n You MUST obey each widget's invocation strategy from the results sections above.\n\n You MUST call `genui_search` command
inside of `web.run` tool if you think there may be a different widget that is relevant.\n </important_requirements>\n\n </genui_search_tool_results>\", \"settings\": null, \"function_namespaces\": null,

Napiši mi kompletan vodič za izgradnju REST API-ja u .NET 9 sa sledećim poglavljima:

Struktura projekta (Controllers, Services, Repositories)

Dependency Injection i registracija servisa

[PERSON_F04D544686EA] sa PostgreSQL — migracije i [ORGANIZATION_2E45DA87A960]

[ORGANIZATION_6E6DFC2B6689] autentifikacija — generisanje i validacija tokena

Middleware pipeline — logging, error handling, rate limiting

[PERSON_E27DDB19C38E] input-a sa [ORGANIZATION_36C35D30083A]

CQRS pattern sa MediatR

Unit testovi sa [ORGANIZATION_C560A6BCCF83] i Moq

Docker compose setup

[ORGANIZATION_DC30310844EB]/CD pipeline sa [ORGANIZATION_46B2DD1519D8] svaki deo daj konkretan kod, ne [NRP_590FE1A967D1] objašnjenje.
